

enhanceU

BROAD SPECTRUM

- Protection of **UVA** and **UVB** radiation
- Critical wavelength > **380nm**
- Maximum at **320nm**
- **UVA/UVB** ratio $\geq 0,6$

PHOTOSTABILITY

- **Superior** to chemical filters.
- **Superior** to other mineral filters: **silica coating**.

STABILITY

- **Stable formulas** over **time**.
- **The unique structure of enhanceU** minimizes the agglomeration of particles in the formula, and thus maintain the SPF values.

- **Nano: UVB protection**
- **Micro: UVA protection**
- **EnhanceU: UVB and UVA protection**

SPF value by Simulator 290AS Solar Light Analyzer
