

# MECHANISM OF KLOTHO ACTION

**Klotho is involved in many cellular functions:** It regulates some growth signals and fights oxidative stress. These pathways result in protection and extension of cell viability. It is for its protector effects and suppressor of aging symptoms that scientists qualified Klotho as the “Youth hormone”.

## TECHNICAL INFORMATION

### APPLICATIONS

- Face care
- Skin care

### CLOTHOLINE RANGE

#### INCI NAMES (active) >

Centaurea cyanus flower extract  
or  
Coumaroyl Methoxytryptamine  
(pure molecule of centcyamine)

#### DOSE OF USE >

SOLUBILITY >  
Water dispersible

#### ASPECT >

Translucent slightly  
yellow to amber liquid

#### ODOR >

Slight characteristic odor

FOR COSMETIC USE ONLY.
