

SUSTAINABLE SOLUTIONS FOR YOUR PRODUCTS

Environmental and social engagement starts with the first steps of a very complex production chain including not only the choice of sustainable raw materials but also care about labor conditions, energy consumption, safety and other aspects. Today, the share of sustainably sourced raw materials is increasing steadily.

Since April 2017, SCHILL+SEILACHER is RSPO (Round Table on Sustainable Palm Oil) certified according to „Mass Balance“ supply chain standard.

This consistent step is an important move to support the global policy on sustainable palm cultivation that will lead to protection of environment, domestic community and resources.

As a matter of course, SCHILL+SEILACHER developed a range of products based on palm oil and palm kernel oil from certified sources.
